### THE SET-UP

When the assembly of infatuated theorists, panicky diplomats and hot-headed bigots set up the re-occupation of Austria as the goal of the great war, if they had dreamed to set up a shadow state in the middle of that continent they could not have been served on the job they were carrying out in Austria.

When they had finished, Austria was a republic containing 32,000 square miles and comprising border most of the six and a half million people. Considerably more than 95 per cent of the inhabitants lived in the city of Vienna; and from that city had been chopped away the territory and the main resources upon which it depended for existence.

The Hungarian wheat-lands which fed its famous mills were gone, as were the bulk of the mineral and other resources needed to support its industrial life. What followed can be told in a sentence. Vienna came to be known to the world as "the city of millions" and the economist, to its devastating credit, had no hand in the business. He was not, later, to have when he said a state could not exist without resources. The map-makers were too busy drawing lines, placing vocal minorities, appeasing clamorous demands for racial self-determination—in other directions.

### THE BACKGROUND

Ninety-seven per cent of Austria's population is German. This element has been dominant in industry, commerce and finance, as in politics. Austria has in fact been an outpost of German race, speech and culture, established beyond the borderline of Slav and Magyar domination.

The idea in the re-settlement scheme was to make it one of a string of "buffer states" thrust as a barrier between western Europe and Red Russia, and also as a buffer against the German ramp through mid-Europe. Considering the origin and racial affinity of the dominant element in the Austrian population, this was about as sensible as to set up the Rhineland as a barrier to German aggression against France.

Less sensible in reality, because the Rhineland was not surrounded on three sides by jealous hostile and aggressive neighbors, nor deprived of the means of livelihood.

That sooner or later this essentially programmatic, lacking the substance of national independence and racial solidarity, was to be a German, politically or commercially, was surely foreseeable. And if not foreseen as the time, that has long been the inevitable outcome of racial pull and economic pressure. Austria could not remain isolated if it wanted to; and a growing and aggressive Germany did not want to. The inevitable has now happened.

### THE EVENT

That the Austrian people will be better off materially there is no doubt. The political could not well be worse, in the economic sense. Whether the country is annexed or not, the Austrian people will be better off. The country is a better place to live in, the country to make sure there would be no resistance. Schuschnigg, with help nowhere in sight, surrendered, and had to become a follower in a radio speech that reads like the statement of a man with a gun at his head.

With characteristic disregard for pledges and consequences, the Reich government, through the terms of the Treaty of Versailles and the Treaty of St. Germain, this, and the attachment of Austria to Germany, is the sinister feature of the affair. Nazism was won another victory, and democracy has sustained another defeat.

That is a defeat in appearance rather than in fact. For to speak of Austria as having been a democratic country is to apply a misnomer. The country is a Reich, a Reich, a Reich, attaining any degree of prosperity under any form of government. It had neither the resources for economic maintenance, nor the geographical location for international trade.

### THE OPEN DOOR

The important question is: After Austria, what? One buffer state has gone. That will be referred to the Reich government, ready to extend his way over the "German minorities" in adjoining states, of whom he means mainly the other day.

Czechoslovakia is the next of the buffer states in line for attention. It contains the largest of the remaining German minorities to whom he referred. It lies between Germany and the Ukraine wheat-lands which he long ago declared to be his objective. It is a barrier

also against German expansion through Hungary and Rumania, also heavy producers of the much-needed wheat.

The significant point is that Mussolini is a party to the destruction of Austrian independence, and the opening of the door to Nazi aggression against the German minorities in Russia. Whatever deal he and Hitler have made, I Duce is willing to risk Austria in German hands, whereas two years ago he was prepared to fight to prevent the Reichsfuhrer gaining control.

That speaks for the solidarity of the Berlin-Rome axis. Whatever the prize Mussolini has to get, he will get it as the result of the alliance. It must be a substantial one, since he is now willing to trust the Gauls in possession of Brenner Pass. When Duce was annexed, I Duce mowed an army on Italy's northern border to hold that gateway should Hitler move into Austria. His change of front is highly significant.

### WHAT PRICE 'APPEASEMENT'?

There never was any chance that Britain and France would fight Germany to preserve Austrian independence. The price of appeasement is not worth the cost to either of them. And the end in itself was not one that could be justified. Independent Austria has been nothing but Austria isolated, shackled, helpless and hopeless.

Should Czechoslovakia be attacked, the danger of a wide-spread conflagration will be much greater. Austria was of use as a buffer state except on paper. Once Hitler repudiated the Treaty of Versailles it was no longer a barrier to him. It could not be counted on to offer serious resistance to him should it come to a matter of force.

Czechoslovakia is quite different. It is a people are anti-German where international politics are concerned and they are passionately determined to preserve their independence. Moreover it is an ally of France. And it is the "key" to the defense of the West. It is the only state marked for attack, can France, Britain and Russia stand as idle spectators of its destruction?

Meanwhile, what about the "appeasement" policy? Hitler has grabbed what Mr. Chamberlain was probably prepared to concede him, without leave of Britain or France, and despite their warning. What are they to offer him now as a price for his abjuration of the Treaty of Versailles? After this fresh demonstration of contempt for their overtures, refusal to be bound by treaty, and reliance upon the iron hand?

Mr. Hansen of Taber reminded the members of the legislature that they had destroyed by their "appeasement" policy the confidence of their constituents. The inference is that the Taber members would like to recall the recall of the Recall Act.

It was stated in the legislature the other day that the average income of people in Alberta is \$200 per head per year. In 1934, the last year of record, the average income of Albertans was \$200, according to the Dominion Bureau of Statistics. In that year \$7140 bought as much on the average as \$95.69 in 1929. Measured by that standard the 1934 average income was equivalent to \$492 in 1929. The average income was the average per head income greater than in Alberta: Ontario, \$461, and British Columbia, \$447.

### Fifty Years Ago

From the Files of the Edmonton Bulletin  
W. J. Graham arrived with freight on Friday, Feb. 14, 1914, on the Great Northern side returned from a trip to the old country.

Shields and Ashen have arrived with their lumber crew.

W. L. Leach, president of the H.B. Co., arrived from the Landing yesterday.

Senator Hardisty has been appointed inspecting chief of the Hudson's Bay Company's northern department.

### THIRTY YEARS AGO

Ottawa—In the upper house Senator Davis offered a resolution that the government, on account of the rapid development of the west and the inadequate facilities for transportation, independent of the Hudson's Bay Company, should take early action toward the construction of the Hudson's Bay Railway.

Dr. Whitelaw, the new medical health officer, appointed by the city council last night, was at the office of the health department this morning.

### TWENTY YEARS AGO

Calgary—The Drunkenness bill is threatened with repeal, it is reported, by the Senate. The government has prepared regulations regarding prohibition which will be laid in a few days.

Washington—A bill has been introduced in Congress empowering the government to take control of all telegraphs, telephones and cables. The legislature has decided to petition the Dominion government to remove the duty from farm implements as a war measure.

### TEN YEARS AGO

The city council has received a petition signed by 144 grocers asking that grocery stores be placed on the exempted list with fruit and confectionery stores, and allowed to remain open Saturday evenings.

Southampton, England—Flight Lieut. S. M. Kincaid, of the Royal Canadian Air Force, was killed in a crash landing on the sea leaving no trace, while trying to break the world record. The passenger of the record is Major de Barnard, Italian ace, who flew 2944 miles per hour.

London—Sir William Johnson-Hicks, home secretary, will introduce a bill for amending the age for women voters from 30 to 21 years.

### Today's Text

"But many that are first shall be last; and the last shall be first."—Matt. 13:12.  
Today's text suggested by Canon G. McCallum, of the Anglican Church, Edmonton.  
Tomorrow's text by Rev. J. H. Miller, Bonnie Doon Baptist Church, Edmonton.

### Canada's New

#### Front Door

(By D. M. LeBourdais, in the Canadian Magazine)

We have arrived at another turning point in world history. Before the day of Columbus, the Mediterranean, as its name implies, was the centre of the world. Up to that time, the people of the world had lived along its near its borders. Then Columbus sailed westward and accidentally discovered America. That discovery shifted the centre of the world to the Atlantic; and now its effective people are largely those who live adjacent to the Atlantic. The next shifting of the world's centre, which is already under way, is to the Arctic Ocean.

At Vilhjálmur Stefánsson, the Canadian-born polar explorer, showed in his book, *The Northern Course of Empire*, published in 1923, man originated near the tropics and has been moving northward ever since. Northern lands are, on the whole, the best suited for human habitation; the largest land masses are in the northern hemisphere, broadest toward the north, and it is likely that ultimately the world's most dominant peoples will be the northern ones.

If you look at an ordinary school globe you will see that the Arctic is the smallest of the continents. Practically overlooked by the long coastline of Alaska and Canada, on one side, and by the even longer coastline of Europe and Asia, on the other, it is really not much larger than the small island of Greenland. It is the United States (Alaska) controls a sector with a base 30 degrees in width; Canada, 30 degrees; Denmark (Greenland), 45 degrees; Russia, 45 degrees; and Norway, 40 degrees. Finland is a negligible factor. Greenland's importance is less than her area might imply because about 80 per cent of Greenland is ice-covered.

Canada and Russia are neighbors across the Arctic Ocean. It is less than 2,000 miles from the Canadian mainland to the Siberian coast, and not much more than 1,200 miles from the tip of Canada's northernmost island to the northernmost Russian island, or about as far from Toronto to Winnipeg.

The distance between Canada and the United States, for that matter—and any part of Europe or Asia are northward.

That is what that means to us in Canada! It means that we are nearer to the coming world centre than the people of the United States. Looking at the globe, with the North Pole and the Arctic Ocean in the center, we see Canada on one side of the globe of oceans and Northern Europe and Northern Asia on the other, while the United States, South America and Southern Asia occupy a zone farther removed from the centre. Thus to fly from the United States to Asia by the shortest route, we must cross Canada and the Arctic or sub-Arctic regions.

Until the coming of aviation, rail was an easier barrier to travel than the top of the world. But flying in the Arctic is no more hazardous, on the whole, than it is in any other part of the globe. Storms and cold weather, if properly precautions are taken and necessary facilities provided, will no more prevent Arctic flying than storms and cold weather prevent rail travel across the continent.

The obstacles to successful flying are mechanical, and apply to flying anywhere. Eventually these obstacles will be overcome; and the Arctic will become the inevitable stage for a shorter distance. The airplane is about to change the shape of the world. And Canada is toward the hub!

### CANADA'S UNIQUE POSITION

From Vancouver to Liverpool, across Canada north of Hudson Bay, and thence by way of Ruffin Island, Greenland and Iceland, is about 10,000 miles; by rail and water, it is about 11,000 miles. From New York to Leningrad, across Labrador, Greenland and Iceland, is also about 10,000 miles. From the tip of Canada to Yokohama, across the Arctic, the distance is about 8,500 miles, while by steam and rail, it is about 10,000 miles. The distance is 9,528 miles.

The Russians, in two flights during 1927—one from Moscow to Vancouver, Washington; and the other from Moscow to San Jacinto, California—have demonstrated the feasibility of flying across the pole. And although Levesque, flying a third time, was killed, his failure no more condemns Arctic flying than Amelia Earhart's tragic death in the South Sea condemns flying across the Pacific.

When the time comes, as inevitably it will, that planes can be counted upon, as a matter of course, to stand the day-to-day strain of long-distance flying and when, as Canada's number of radio-equipped meteorological stations are established along the way, flying across the Arctic will become as easy as flying across the Atlantic, or even across the Pacific.

### THE NEW FRONT DOOR

Then will Canada's back door become its front door. It will no longer amount to much, for no one has even envisaged seriously toward the supposedly green fields of the United States, turn their eyes northward and see the Arctic. They will find satisfaction in broad expanse of their own country. It does not require a prophet to predict that within the lifetime of most of you who read these lines, flying over the Arctic will be gridironed with air routes connecting United States and Canadian points with important points in Asia and Europe. The shortest route will win in the end!

But so long as Canada remains a narrow strip of territory along the northern border of the United States it will not amount to much among the nations of the world. It will inevitably fall apart like a string of beads when the United States decides to turn its back on the narrow strip of territory which has been its back for so long.

Yet most Canadians, consciously or unconsciously, still think of Canada as a vast land with a vast hinterland, mostly barren, lying to the north of the United States.

### Your Health

By DR. FRANK MCCOY

I notice that many of your letters deal with questions about eczema and in today's article I am going to answer those most often repeated.

Many readers wish to know if eczema is "catching." Eczema is not contagious and if some other member of the family is troubled with it, you are in no danger.

Several letters have inquired why it is that eczema may seem to be worse in winter than in summer. The answer is that the typical patient with eczema has a dry skin. When eczema develops in a skin of this type it generally becomes most noticeable during cold weather and tends to clear up as the weather grows warmer.

Some of my readers wish to know at which age eczema is most often found. Inasmuch as eczema is found at every age, from the time of infancy clear through old age, it can not be said to be as frequent at any period of life than at any other.

The patient with eczema nearly always notices that soap and water make the affected parts itch. This is characteristic of eczema and it is often advisable to avoid the use of soap on the involved areas and to use olive oil and clean absorbent cotton as a dressing. Treat the cotton off in a small piece as a bandage; then use each piece only once, discarding as soon as it has touched the skin, taking a fresh piece for the next part of the cleansing procedure.

Another common question about eczema concerns the cause. The causes may be divided into two groups. Those coming from the inside of the body and those coming from the outside. The inner causes are the true causes, while the outer are exciting causes. In the average case, both types of causes are working together.

Among the inner causes may be considered: A tendency toward eczema of the skin which gives it a tendency toward developing this particular kind of irritation; constipation; incorrect diet; and the use of improper food combinations.

Probably the most common of the inner causes acting as exciting causes in setting off eczema in a susceptible individual include: Chafing of the skin, such as occurs from the rubbing of clothing; external irritation, such as dust, produced when the skin is exposed to chemicals, acids, etc.; and in some cases, exposure to heat or cold.

The patient who is just developing eczema often wants a description of the symptoms in order that he may decide in his own mind whether his symptoms are those of eczema. The common symptoms are: Redness, itching and burning, the formation of blisters, the oozing of a sticky fluid, the appearance of dry cracked skin, and the appearance of scales. In some cases eczema may cause deep cracks to form which are slow in healing. The symptoms found in any case depend upon what type of eczema is present.

In "weeping" eczema, oozing of fluid is characteristic which will not be present in the "dry" type of eczema.

You are welcome to send for my article on ECZEMA whenever you wish. An article on ECZEMA IN THE CHILDREN, also available, either will be forwarded to any reader who writes to me and encloses a large, stamped, self-addressed envelope.

the northward. Some, it is true, have in recent years come to think of this northward as being the "new" frontier. They have been told of silver and radium and are being misled near the Arctic Circle so rich that it can be profitably transported to the south by air and two thousand miles by rail. They are being misled of oil being pumped from wells at Fort Norman to supply power for mines at Great Bear Lake.

Nevertheless, the most of them still refuse to believe that the Arctic is a land of opportunity. Perhaps the ordinary citizen is not so much

### ADVANTAGES TO CANADA

to blame for having such an opinion when government officials are so ready to tell them that even obstruct its development. Yet the development of no part of Canada would so greatly advance the interests of all Canada as that of the North.

I am sure that the North is a land of opportunity recognized by the statesmen who made Confederation possible as their next great task. But I am sure that the North is a land of opportunity, and that the opening up of the North is now much more essential to the future welfare and importance of Canada than the development of the West ever was.

Except for the exploitation of an unusually rich mine, such as for example, as the Eldorado mine at Cameron Bay, the development of the North cannot be undertaken by unaided private effort. To develop the country properly, long-range planning is necessary; immediate results are not to be expected.

The complete aerial coverage of the North, and especially trans-polar coverage by air, will not be possible until the government has been providing at least the necessary radio-equipped meteorological stations and other scientific facilities for the North.

Russia has only recently emerged from feudalism. Until recently, the vast majority of Russians were illiterate. Their industrial and scientific progress was far behind that of the West. They did not have the trained men and women that were available to us. Yet, despite all these disadvantages, it must be admitted that they are doing a magnificent job of developing their country in a manner which should make us heartily ashamed of our own relative failure. There is nothing to be gained by the government of the West that we cannot do as well, or even better, in the Canadian North. But this we will never do until we overcome the mistaken belief that the greater part of our country is but a barren and useless waste.

"Gregory, please try to look more comfortable. You're upsetting the hostess."

### EXPERIMENTAL FUR FARM

Editor, Bulletin: I read in the issue of March 2, a letter signed J. B. Gillis, secretary of the Northern Alberta Fur Breeders' Association, in which he refers to a letter written by me relative to the Game Department and especially William Colpitts, one of the men who are in charge of the fur farm.

First, I might interest Mr. Gillis to know that several years ago I offered a pair of foxes to the University of Alberta, free, for experimental purposes and I received a reply, thanking me, stating that he did not have a proper way to look after them at the time being. I have strongly advocated an experiment to report regularly when the present I called on the present Minister of Agriculture in this connection shortly after he was appointed to office, offering him all the assistance as an old fur farmer and for a long time I was able to give. I trust that I have made my point clear that I am fully in favor of a properly run experimental fur farm.

Secondly, And I consider this a most important and essential question that should be answered, not by Mr. Gillis, but by the Game Department, or Mr. Colpitts himself. Where has he ever been? He has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Thirdly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Fourthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Fifthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Sixthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Seventhly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Eighthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Ninthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Tenthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Eleventhly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

Twelfthly, I would like to know if Mr. Colpitts himself has been in the Provincial Department where all the experimental fur farms are, and is raising any kind of fur bearing animals? This question has been asked on many occasions, and is still unanswered by the proper authorities, so if Mr. Gillis has any information or suggestions looking for the names of fur farmers, he might be able to give us the names of the fur farmers who are raising any kind of fur bearing animals.

### Sunshine

#### Shafts

She was a Boston provincial, and smacked of the Back Bay. Approaching the entrance of the Hotel, she said quite patronizingly: "To Whom It May Concern, something a trifle am, without being the least bit shy."

"To Whom It May Concern, something a trifle am, without being the least bit shy." "You have spoken longer to you please," was the opponent's smiling reply.

"What's become of all those old shafts? I used to see in the bar-ber shop?" "Oh, most of them are shaving themselves now. I guess."

## Looking Them Over

By Jack Kelly

### Trail is Tough System Proved Better Parking

YOU can definitely count on Trail giving the Edmonton Athletic Club a whole of a battle in tonight's second game for the far-west junior hockey championship. Heavy from a rapid-fire series of games and long to train trail to would slow up even a NHL squad, these B.C. champs have the E.A.C. plenty of opportunity Saturday night. Rested up, Trail will be a lot tougher to beat tonight.

On the form that they showed Saturday, the Trail squad seems to lack the finish around the goal that the E.A.C. has, but beyond that they pretty well held their own. The Trail defence is husky, tough and capable, while their goals appear well as if that could reasonably be expected of any outdancer.

Something like 4,000 fans saw the opening tilt of this two out of three series and went home satisfied that tonight's game is certain to be even faster and more sensational. Trail simply must win or draw and the team is determined that it will be a win. These youngsters seem to have a knack of coming from behind in a series.

Both clubs played clean, fast hockey Saturday. The Trail outfit indulged in none of the petty, spoiled-kid tactics that marred the performance here of the Calgary Columbus club. They are the sort of youngsters that the fans like—even if they do threaten the E.A.C. with elimination. Tonight's tilt should be a classic. You'll be sorry if you fail to see it.

☆☆☆

### Season Ends For Saskatoon Quakers

BATTEN 1-0 by Flin Flou Saturday night in the eighth game of the ten-day series that determined the northern Saskatchewan senior hockey championship, the season is over now for the Saskatoon Quakers are concerned.

But what is a season? It is definitely proved that the way to make senior hockey boom is to have one team represent the city as a whole, to back it, team with a city-wide organization prepared to produce the necessary funds and then to get the best talent available. No information is available before the start of the title series with Flin Flou, the Quakers had picked up a bank roll of \$7,500 in the season's operation. Whether that amount is correct, I can't say, but it is on what appears to be reliable authority.

With that sort of a war chest, you can count on Saskatoon being an even stronger contender next season. If Edmonton has Alan Cup intentions for 1939, it will certainly have to figure on lining up a squad that can beat Saskatoon.

So far as we are concerned here, the most interesting angle left in the senior title hunt is the question of how Calgary Rangers compare with the provincial champions in British Columbia and Saskatchewan. It will be a rough sort of measuring stick that will give us an idea of just how good we have to be next season.

☆☆☆

### Regina Reinforces Roughriders

JUDGING from stories coming out of Regina, the Saskatchewan football league is getting set to plunge back into the Western Conference capital city struggle next fall with a revamped team that should be considerably stronger than the 1937 club.

Coach Griffing is said to be planning on at least four new U.S. imports to bolster his Roughriders. Two of them are from his home state of Kansas, Mickey Parks and Kelly. Regina scouts are now trying to line up a top notch end and a fullback.

Calgary also seems determined to make another drastic effort with Chris Crumley out of the ground and backing Winnipeg is looking for a coach to replace Bob Fitz and place in the Bomber camp call for a general strengthening of the club. Right now it seems certain that the standard of play in the conference will be stepped up for 1938.

☆☆☆

### The Folks Would Appreciate This

A MINUTE's estimate are now before the city council and it would make a big hit with the citizens if the city fathers can get aside the considerable sum needed to improve the parking facilities at the arena. There is plenty of area available, but considerable difficulty must be done and topped off with a new parking lot.

With the amount of travelling that will shortly be underway in the city, it should be possible to obtain all the dirt needed for filling low places at the arena. The city has plenty of clinders and men to spread them, but that is not the real problem. The real problem is the cost of hauling involved. It is a chance to make a major improvement at very little cost that should not be missed.

### Dick Demaray Checks in To Finish Training Here

LOOKING fit and ready to step 10 fast rounds right now, Dick Demaray arrived in Edmonton on Sunday evening from Bismark, North Dakota, to polish off his training for his headline bout with Eddie MacPac in the New Empire theatre on St. Patrick's Day—Thursday.

Wetmore of 14 years ago, Demaray will show some of his little goods at 7:30 p.m. today when he works out the Osborne gym in the basement of the McLeod Building. He is a left-hander with a sock that has left the off his opponents for the last time.

Against this proven punching power, MacPac will match a heavy style that has been in the making for several years. The two middleweights in western Canada have the admitted class of the Lewis of Seattle. Eddie can also show plenty of thunderbombs himself. His body should be in the way of lifting the victim right from his feet. The MacPac action is very discouraging to put it mildly. He has chalked up his share of knockouts and he is confident he will be able to hold his own against the Bismark Bomber.

Although the real test does not come until Tuesday night, Demaray has a large number of reservations on hand. It is an odd test for MacPac and present indications are that he is a capable boxer if the weather continues favorable.

The United States government has ordered the aerial service in 1938.

## E.A.C. BEAT TRAIL

## BULLETIN

### Edmontonians to Blast Pins Here

Five thousand fans watched Edmonton Athletic Club overwhelm Trail Tigers, 4-2 at the Arena Saturday night in the first game of their best two-of-three series for the far western junior hockey championship. A driving third period offensive paved the way for their margin of triumph as they broke a 2-2 deadlock, rifling home two goals in the last 10 minutes of play.

Tonight at the Arena, starting at 8:30 o'clock, these two teams meet in the second and crucial game of the series. A triumph for the E.A.C.'s will mean the end of Trail's invasion here and will send the Edmontonians against Saskatchewan's champions, either Saskatoon Chiefs or Moose Jaw Canucks. Should Trail cop the decision tonight, a third game will be necessary and will be played here on Wednesday night.

Sam McKee's Club had the fight from behind Saturday night. Down one goal after a scintillating first period, the E.A.C. rallied to even terms with Trail after the latter team opened the scoring. E.A.C. jumped into the lead before the second frame ended, but only by their margin wiped out at the start of the final frame.

After a strenuous week of hockey playing five games in six days, the Trail crew showed plenty of spark in the play. The Tigers made two goals in the first period, but they had a fair amount of system to their attacks, while their defence was strong. George Sopko played a great game in goal for the British Columbia club.

Blasters from all parts of the continent are in action on the 40 alleys, the greatest number ever built for the event, on opening night.

# FLIN FLON BOMBERS SKATE TO THIRD GAME BY MEDICINE HATTERS

## BOSTON CLINCHES NATIONAL HOCKEY LEAGUE CHAMPIONSHIP

### EDMONTON MDGETS FORCED INTO THIRD GAME BY MEDICINE HATTERS

**NEW YORK, March 14.**—Boston Bruins clinched the American division title in the National Hockey League last night by defeating the New York Rangers 2-1.

The victory gave the Bruins, who have won three games to play, Boston will oppose the Toronto Maple Leafs, International Hockey League winners, in the playoff series for the league championship.

The winning goal was fired by Woody Dumart, with only 32 seconds play remaining in the third period.

Reinhardt had to come from behind, scoring both his goals in the final session. Alex Shulzky saved the Bruins a lead when he scored their only marker early in the second period.

## Toronto Leafs Assured of First Place Canadian Division; Tie Canadians.

TORONTO, March 14.—The one-point Maple Leafs gained in a 3-3 tie with Montreal Canadiens in a National Hockey League game played here Saturday night assured the Toronto team of first place in the final standings of the Canadian division.

The result, coupled with New York Americans' 4-1 victory over the Canadiens in Montreal, dropped the Canadiens to third place in the division, one point behind the second-place Maple Leafs.

The Leafs were forced to come from behind twice Saturday night to split points with the Canadiens.

The "hitters" kept the game through overtime and in the fourth period, when they scored three goals to tie the game.

Reinhardt, the Leafs' leading scorer, picked up a loose puck and slipped it into an open net for the first Toronto marker.

## Nels Stewart Wins Amers Second Place Taking 3-1 Win Over Maroons

MONTREAL, March 14.—Nels Stewart, veteran of 13 National Hockey League seasons, scored a second triumph as he led the Montreal Maroons to a 3-1 victory over the Chicago Black Hawks Saturday night.

The 29-year-old forward broke a 1-1 tie in the first period with a four-minute play remaining.

Stewart's first goal was the final blow—but it was not.

Chicago's Bill Galt scored into an empty net with Galt's second goal.

## Nels Stewart Wins Amers Second Place Taking 3-1 Win Over Maroons

DETROIT, March 14.—Carl Liscombe's three goals kept Detroit Wings in the National Hockey League playoff picture last night as he led the champions to a 3-1 victory over the Chicago Black Hawks.

Liscombe, diminutive forward scored three goals in a minute and a second of the game, giving Detroit the Wings to victory over Chicago before 10,000 spectators.

The victory secured Detroit's mathematical chance to overtake the Hawks for a third place playoff berth, cutting Chicago's advantage to four points. The Hawks have two games to play, the Red Wings three.

## Calder Defeats Westmont 3-1 For Fuck Title

Calder captured the Community Hockey League junior championship at Varsity night, defeating Westmont 3-1.

It was the third game of the series, and Calder won the first two games and being held to a 2-2 draw in the second.

Calder opened the scoring in the first period by scoring a goal and a pass over in the second, leading to a 2-0 lead. Calder's second goal came in the third period, and he scored the winning goal in the fourth period.

## Community Leagues Will Meet Tuesday

The Federation of Community Leagues Recreation committee will hold a meeting in room 10, Sandhill block, 707 Jasper Ave., Tuesday night, 8:00 p.m.

Special item on the agenda is the question of commercial sponsorship for Community League sports teams.

All those interested in Community League sports are urged to attend this meeting.

A Community League girls' athletic meeting is being held at the same address at 8:00 p.m. this evening.

## Oxford Breaks Losing Streak AT TRACK MEET

LONDON, March 14.—Paced by Alan Pennington, the Oxford University team, defeated Cambridge 50 points to 37 in the 1938 renewal of their ancient rivalry in track and field.

Pennington, the Oxford captain, won his specialty, the 100-yard dash, in 10 seconds and then scored a decisive second place to give Oxford its first victory since 1934.

When the field lined up for the final event, the quarter-mile run, Oxford led 50 points to 37 and the Cambridge needed the first two places to win.

## English Rugby

LONDON, March 14.—Results of English rugby union matches played Saturday night:

1. Bath 6, North 16; 2. Bristol 10, London 10; 3. Devon 10, Gloucester 10; 4. Exeter 10, Harrogate 6; 5. Gloucester 10, Leicester 10; 6. London 10, London Scottish 10; 7. Devon 10, Devon 10; 8. Plymouth 10, Bristol 10; 9. Plymouth 10, Bristol 10; 10. Plymouth 10, Bristol 10.

## Morse Code Victor Over Golden Mile

CHELTENHAM, Eng., March 14.—After winning the event five successive times, Dorothy Page, 17, won the Golden Mile, finally giving her team, the Cheltenham Gold Mile, a 1-0 lead in the series.

Page, a member of the Cheltenham Gold Mile team, won the race in 10 minutes and 10 seconds.

## Famous English Cricketer Dies

VANCOUVER, March 14.—W. O. Davis, who played for Warwickshire in English county cricket 40 years ago, died in hospital here Saturday.

Davis was 81 years old.

## Major League All-Stars

Following is the eighth of a Canadian series of All-Star games, which will be played in the city of Vancouver on Saturday night.

The game will be played at the Vancouver Coliseum.

## For Emergency

COMMO, March 14.—The Registrar-General of Civilian has been appointed food controller to take stock of food supplies in the city.

The food controller will be responsible for the distribution of food supplies in the city.

## Time Out - By Chet Smith

"Sure, I saved the hole—these practice runs are no good, I like to see you pop in."

## Bombers Dynamite In Eighth Battle

SASKATOON, March 14.—Flin Flon Bombers ended the Northern Saskatchewan Senior Hockey League's season Saturday night when they defeated Saskatoon Quakers 1-0 in the eighth game of the playoff series.

The Bombers now will meet Moose Jaw Millers in the final game of the series.

## Handful GREETING RETURNING TEAM OF TRACK STARS

VICTORIA, March 14.—The trans-Pacific liner Niagara brought Canada's athletes home from the recent British Empire games in Sydney, clanked here early Saturday.

The athletes were met by a handful of spectators on the pier to greet the returning team.

## Glenn Cunningham Acclaimed Finest

NEW YORK, March 14.—Glenn Cunningham remained today as the mightiest miler of all time after the New York indoor season went on in record-breaking and whirlwind fashion.

Cunningham's record of 1:58.2 for the mile was broken by Norman Bright at 1:57.8.

## Canmore Defeated By Bralorne Club

# MANIPULATION OF MONEY HIT BY MINISTER

Financial Monopolists Are Cause of Artificial Scarcity, Manning Says

Alberta people are coming to a full realization of the fact that restriction and manipulation of money and credit by the financial monopolists is the "very definite cause of the artificial scarcity which our people are forced to endure," Mr. Ernest E. Manning, minister of trade and industry, declared in addressing the Edmonton Proletarian Club conference at the Grand Hotel on Sunday.

The Minister declared that the correspondence received by the Government this week, testifies to the desire of the people of Alberta to have a more plentiful supply of money and credit. He pointed out that the financial monopolists are the cause of the artificial scarcity which our people are forced to endure. He pointed out that the financial monopolists are the cause of the artificial scarcity which our people are forced to endure.

After reading a resolution passed by the Edmonton Proletarian Club, Mr. Manning said: "As we cannot produce the unnecessary amount of money for our people, one cannot help but think that the artificial scarcity of money is the cause of the artificial scarcity which our people are forced to endure. He pointed out that the financial monopolists are the cause of the artificial scarcity which our people are forced to endure.

# Family Seeks Haven

The photograph above, taken before Chancellor Dollfus of Austria was assassinated, shows him with his wife and two children, who today flee to Czechoslovakia.

BRATISLAVA, Czechoslovakia, March 14.—The widow of Chancellor Engelbert Dollfus—assassinated in the Austrian Nazi putsch in 1934—arrived here today with her two children, in flight from Nazi-dominated Austria. With no idea where she would go, Frau Dollfus declared she was simply seeking "security" for herself and her children.

# ESTIMATE FOR CITY EXPENSE IS \$1,966,615

Part of 1938 Budget Is Brought Down—Unemployment Ask More Relief

Interim report on the 1938 budget brought down Monday by city commissioners shows estimated departmental expenditure of \$1,966,615 for the year ending March 31, 1939. This estimate will be considered by city council at its regular meeting Monday night.

Expenditures for 1938 on departmental financing show an increase of \$23,902 as compared to actual expenditures for last year which totalled \$1,942,713.

There is a slight drop in estimated revenue from departments, the decrease being \$1,900 as compared to total revenue of \$1,929,205 in 1937.

Unemployment relief costs are estimated at \$400,000, a decrease of \$20,000 as compared to actual expenditure of \$420,000 last year.

OTHER ESTIMATES  
The biggest part of the 1938 budget is yet to come. Estimates still to be compiled by commissioners include the cost of the library board and two school boards; bank interest, discount and exchange; local improvement taxes on forfeited property; and delinquent interest and redemption.

Other questions yet to be dealt with by council Monday night include a request by the University of Alberta for an increase of 25 per cent in relief allowances.

Altimus, who has dealt with a report from commissioners proposing an expenditure of \$45,000 for underground parking for the new north telephone exchange.

AMALGAMATION PROTESTED BY RAIL WORKERS

Continued From Page Nine  
frustrate any move toward unification or amalgamation.

Chapman went on to state that the present unification move was a conspiracy, with its spearhead in the C.P.R. and that it was a move to take advantage of the C.P.R. shareholders to get divided profits.

# \$20,000 For Prairie Seeding

FINANCE ALLOTTED

REGINA, March 14.—Financing of a seeding program for Saskatchewan has been approved by the provincial government totaling in all between \$2,000,000 and \$2,500,000.

The money will be used to seed the prairie to be made by the banks under Federal guarantee up to about \$100,000. The seeded acreage for the coming year was estimated at roughly 100,000 acres for all kinds of grain crops.

Completed seeding is popular in Saskatchewan, where more than 20,000,000 acres are under cultivation.
